ASSIGNMENT 1

Fully Dressed Use Case (Table Format): Supervisor Review

Attribute	Description
Use Case ID	UC-03
Use Case Name	Supervisor Review
Primary Actor	Supervisor
Goal in Context	Supervisor reviews a student's project proposal to decide approval, rejection, or request revisions, providing clear feedback to guide student project development.
Stakeholders and Interests	- Supervisor: Ensures proposals meet quality standards and provides timely feedback. - Student: Receives actionable feedback and decision status. - System: Tracks review status and stores feedback securely.
Preconditions	- Supervisor is logged into the system with a valid account. - A student proposal exists and is assigned to this supervisor.
Postconditions	- Proposal status updated to Approved, Rejected, or Revision Required. - Feedback comments saved and linked to the proposal. - Student is notified of the outcome and feedback.

Trigger	Student submits or resubmits a project proposal for review.
Main Success Scenario	1. Supervisor logs into the system. 2. Supervisor navigates to the 'Assigned Proposals' dashboard. 3. System displays a list of proposals awaiting review. 4. Supervisor selects a specific proposal. 5. System displays proposal details (description, attachments). 6. Supervisor reviews the proposal content. 7. Supervisor enters feedback comments and selects a decision (Approve, Reject, or Request Revision). 8. System validates the decision and feedback. 9. System updates the proposal status and stores feedback. 10. System notifies the student via in-app notification and email.
Extensions (Alternate Flows)	4a. No proposals assigned: 1. System displays 'No proposals assigned.' 7a. Feedback missing: 1. System shows an error prompting to enter feedback. 2. Supervisor enters feedback and retries. 10a. Notification fails: 1. System logs the error. 2. Supervisor is warned and can resend manually.
Special Requirements	- Feedback input limited to 2000 characters. - Decisions must be one of the predefined options (Approve, Reject, Revision Required). - Review interface must load within 3 seconds. - All review actions must be audit-logged for traceability.
Frequency of Use	Occurs whenever students submit proposals; typically daily during submission periods.
Assumptions	- Proposals are properly formatted by students. - System email service is operational.
Open Issues	- Should supervisors attach annotated documents alongside feedback?

	- How to handle overdue reviews and reminders?
Related Requirements	- FR-02: Manage Project Proposals - NFR-01: System Performance - NFR-03: Audit Logging
